AT A GLANCE

15+ Production apps shipped & live

50K+ Downloads on a flagship app

4 yrs Fintech, commerce & logistics

CORE COMPETENCIES

MOBILE
Flutter · Dart · Riverpod · Bloc · GoRouter · Hive

WEB
Next.js · React · TypeScript · JavaScript · TailwindCSS

BACKEND
Go · Node.js · Python · Java (Spring Boot) · REST · WebSockets

DATA
PostgreSQL · MongoDB · Firebase · SQLite

CLOUD & DEVOPS
AWS · Docker · GitHub Actions

PAYMENTS
Telebirr · Chapa · Stripe · PayPal

PRACTICE
Clean architecture · Custom OAuth · Real-time systems · Multi-tenant design

EDUCATION

B.Sc. Computer Engineering
Jimma University · 2017 – 2022

RECOGNITION

Winner — final-year project, computer stream

2nd place — Jimma Institute of Technology final-year competition

Winning team — *Hack into Bright Ethiopia*

Abdulsemed Mussema

SENIOR SOFTWARE ENGINEER

Mobile · Full-Stack · Fintech

PROFILE

Senior software engineer with **4 years** shipping production software across banking, e-commerce and logistics: **15+ live products**, including corporate banking and financing platforms for the Cooperative Bank of Oromia and a commerce app with **50K+ downloads**. I work end to end — architecture, implementation, CI/CD and store release — across Flutter, Next.js, Go, Node.js and PostgreSQL, integrate payment rails most teams never touch (**Telebirr, Chapa, Stripe**) and use Cursor to ship faster.

EXPERIENCE

Software Engineer I

Sep 2023 – Present

Cooperative Bank of Oromia

- **TAS Corporate Portal** — multi-tenant corporate banking platform in three apps: a **Customer Portal** where company users (Maker, Checker, Admin, Viewer) approve loans, trade, FX, transfers and RTGS under a signatory matrix; an **Internal Portal** for bank staff to onboard customers and process requests; and a **Spring Boot Portal Core** that enforces the matrix, isolates company data and routes approved requests to CoopStream, TSS and the API gateway.
- **Super-app architecture.** Modular Flutter platform (Riverpod, GoRouter, clean architecture) hosting multiple mini-apps with user-type-based UI.
- **Mejlis Digital Hub** — multilingual Flutter app (Android, iOS, desktop) for Islamic giving: Zakat calculator with QR payment, awqaf, donations and impact stories.
- **Michu-Mizan** — Sharia-compliant MSME financing: Murabaha and Musharakah flows, secure auth, Firebase push, REST integration.
- **VSLA Mobile App** — led savings and lending for village associations: groups, contributions, loans, member ledger, offline storage (Hive), location services, multi-language UI.
- **Michu Lending Affiliate App** — live on Android and iOS; referral rewards with real-time points redemption.
- **Merchant Nation Command** — built solo: full-stack field-operations platform (Next.js, Node.js, TypeScript, PostgreSQL) on AWS.
- **Bank Cooperatives Management System** — secure web platform for member finances, loans and communications. Also contributed to **DxValley** (startup ecosystem) and the **Coop Bank Mobile App** (in development).

Software Engineer

Jan 2023 – Present

HudHud Corporation PLC

- **CommercePal** — B2B/B2C commerce app (Flutter, Firebase, Stripe, Bloc) with listings, cart, checkout and device-level logic. **50K+ downloads** on Google Play.
- **Hudhud Delivery** — customer and driver apps on the App Store with live tracking and maps.
- **HudHud Express** — courier and logistics app: shipment tracking, barcode scanning and real-time order status over Socket.io.
- **Custom social login, no Firebase** — Google and Facebook sign-in via custom OAuth.
- **Custom push service, no Firebase/OneSignal** — WebSocket delivery with token targeting.

Software Engineer

Meri Technologies PLC

- **AbayStock** — multi-vendor inventory platform (Next.js, TypeScript, PostgreSQL): live SKUs across warehouses, role-based access, barcode workflows.
- **AbayCRM** — bilingual, multi-tenant CRM unifying online, app, showroom and phone orders; public REST API with webhooks.
- **AbayMart** — shopping app with **Telebirr payments**, order tracking and in-app chat.

Software Engineer

FastPayET

- Contributed to multiple remittance app experiences, from feature development to the end-user flow.
